

OUR HIGH PERFORMANCE ELECTRICAL CONDUIT

Voltshield is a high-performance electrical conduit. The unique ribbed design significantly reduces friction during cable installation, making it more efficient and reducing downtime. Voltshield provides a permanent conduit for power cables, ensuring reliable long term cable protection.

PRODUCT FEATURES:

- Available in 2.00", 3.00" and 4.00". Comes standard in 10 ft and 20 ft lengths. Also available in reels for long continuous length applications (850 ft-4000 ft)
- Manufactured here in Canada from durable and flexible CSA approved High Density Polyethylene resin
- VOLTSHIELD is registered to standard CSA C22.2 no.327-18
- Internally ribbed to reduce friction during cable installation
- Reliable long term cable protection, providing a permanent conduit for power cables

STANDARD

- Sequential foot markings
- Internally ribbed to reduce friction on cables during installation
- CSA C22.2 no.327-18 HDPE Conduit

OPTIONS

- Custom colors and print lines available upon request
- Pre-installed 450 lb to 1250 lb pull tape or detectable pull tape
